ACKNOWLEDGEMENT

First and foremost, we would like to thank the God almighty for showering his blessing throughout our life.

We take the privilege to express hearty thanks to our parents for their valuable support and effort to complete the project.

We take this chance to express our deep sense of gratitude to our Management for providing an excellent infrastructure and support to pursue project work at our college.

We are deeply indebted to our beloved principal **Mr.A.M Rasheed** for his keen interest in providing all the facilities and encouragement.

We express our profound thanks to **Prof. K Abdul Rasak** Head of the Department, for his able administration and dedicated cooperation which motivated us along the course.

We would also like to extend our sincere thanks to our project guide **Mr. Shanavas C.T** for his valuable advice and guidance at each and every stage of the project, which helped a lot in the successful completion of the project.

We are very much grateful to all the staff members and lab instructors for the service and support rendered throughout the project work.

Last but not the least we take this opportunity to thank all our friends for their kind hearted cooperation and encouragement which directly or indirectly helped us throughout our work.

ALBIN SALU

ABSTRACT

In the current scenario, the importance of digital systems such as Net banking, E-commerce, E-payment are at the heights. Moreover, the latest reports are showing that people are getting relied on online payment systems even for the simple yet basic transactions in day-to-day life. This is the main inspiration behind this project.

We know that Paytm, FreeCharge, are some of the best known and popular mobile commerce platforms in India. What we intend through this project is that, to develop a system similar to these.

Our project is named **ONLINE PAYMENT PORTAL**. In this project we intend to develop a digital wallet for the users of the site which enables them to add or retrieve money in it. It also provides the facility to transfer money between accounts. Another key facility that our proposed system provides is an e-payment gateway which enables to Pay bills for several services such as mobile, Electricity, TV etc.

TABLE OF CONTENTS

TITLE	PAGE NO
1. INTRODUCTION	
1.1. About Organization	3
1.2. Problem Definition	4
2. SYSTEM ANALYSIS	
2.1. Principles of System Analysis	6
2.2. Existing System	7
2.3. Proposed system	6
2.3.1 Advantages of the Proposed System	8
2.3.2 Objectives of the proposed system	9
3. FEASIBILITY STUDY	
3.1 Feasibility Study	
3.1.1 Economic Feasibility	12
3.1.2 Technical Feasibility	12
3.1.3 Behavioral/operational feasibility	13
3.2 System specification	14
3.2.1 hardware configuration	14
3.2.2 Software description	14
3.2.3 Frontend description	14
3.2.4 overview of the language used	15
3.2.5 Overview of the database used	17
4. SYSTEM DESIGN	
4.0 System Design	22
4.1 module design	23
4.2 data flow diagram	25

4.3 User Interface Design	30
4.3.1 Input design	30
4.3.2 Output design	30
4.4 Database design	31
4.5 Table design	34
5. TESTING	
5.0.1 black box testing	39
5.0.2 White box testing	39
5.0.3 Software testing strategies	40
6. IMPLEMENTATION	
6.1 Implementation procedure	43
6.1.1 User training	43
6.1.2 Operational documentation	44
6.1.3 System maintenance	44
7. CONCLUSION AND FUTURE SCOPE	
7.0 Conclusion and future scope	46
